### About Our Guides

University Parent Media works closely with institutions around the country to bring together the most relevant, timely information into one all-inclusive resource.

We have published this guide with the mission of helping you easily navigate the University and its surrounding community. Ultimately, we hope these resources help nurture your connection and involvement in your student's college years!

### Make the Most of Your Parent Guide

- Hang on to your Guide! Inside you'll find information that's useful all-year long, including important phone numbers, web sites and calendars.
- Store your copy in a purse or glove compartment for convenient reference.
- Pass it along to parents of prospective college students to promote the school.
- Please recycle when finished!
- Discover more content, tips and local business information by visiting us online at: [www.universityparent.com/hartford](http://www.universityparent.com/hartford)

## About the University

**The University of Hartford is a fully accredited, independent, nonsectarian, co-educational institution with the main campus located on approximately 350 wooded acres in West Hartford, Connecticut.**

The University offers educational and career programs in 84 undergraduate majors and 34 graduate degrees at the masters and doctoral levels in the liberal arts, sciences, business, engineering, technology, art, music, education and allied health professions.

Part of the institution dates back to 1877, when the first of its original three schools was founded. The Hartford Art School (1877), Hillyer College (1879), and the Hartt School (1920) joined in 1957 to form the University of Hartford. The university is presently composed of seven degree-granting schools and colleges: the College of Arts and Sciences; College of Engineering, Technology, and Architecture; College

of Education, Nursing, and Health Professions; Hillyer College; the Barney School of Business; the Hartford Art School; and The Hartt School.

Approximately 7,200 students are presently served by the university's various programs and are drawn from 43 states, and 60 foreign countries. The current full-time undergraduate enrollment is about 4,700 men and women. Sixty-five percent of the freshman class is from out of state with about 92% of them living on campus. Students at the University of Hartford benefit from small classes and personal attention while being offered a wide variety of majors, extensive facilities, and a broad spectrum of activities typical of large universities. ■

## Schools and Colleges

### COLLEGE OF ARTS & SCIENCES

The College of Arts and Sciences is the largest and most comprehensive college in the University of Hartford. Its offerings range from the humanities (history, English, modern languages, philosophy, art history) to the social sciences (psychology, sociology, economics, and politics and government), and physical and natural sciences (biology, physics, and chemistry). The College prides itself on its diverse academic programs including special programs such as Criminal Justice, International Studies, Rhetoric and Professional Writing, Political Economy, and Judaic Studies. Professors from all of the College's programs inspire you to think analytically, to form your own conclusions, and to express yourself clearly—the very best preparation for careers and life. Students in the College of Arts and Sciences can not only take courses in other colleges at the university, but also can do a second major or minor to enrich their academic experience and prepare for the future.

#### School of Communication

With the right mix of academic and professionally-oriented coursework and a broad array of communication courses, the College of Arts and Sciences' School of Communication prepares you to graduate ready to enter the work world and equips you with the knowledge and skills to adapt to change. You begin taking courses in the core of the major in your first semester and then select among specializations in Advertising and Public Relations, Human Communication Studies, and Media and Journalism. You can get involved in STN-2, the student television network; WSAM, student radio; PRSSA, the local

chapter of the Public Relations Student Society of America; or the Informer, the student weekly newspaper. Our students also often are successful participants in the American Advertising Federation's National Student Advertising Competition.

### BARNEY SCHOOL OF BUSINESS

Business Careers are global and dynamic. The AACSB accredited Barney School of Business provides students with a variety of experiences to make them "career ready" for the expanding opportunities of the 21st century. We prepare men and women to be leaders and decision makers who act in socially responsible ways in this global environment. Barney's curricular and co-curricular activities give our graduates work experience through internships, good communication skills, the ability to use information technology in solving problems, and understanding of the global nature of today's business. Courses are taught in an interactive manner with cases and projects to give students hands-on learning opportunities.

### HARTFORD ART SCHOOL

The faculty, students, and staff of the Hartford Art School are committed to helping each student explore the wide range of possibilities available to the accomplished artist and designer of today. By providing the rigorous formal training of a professional school with the University of Hartford's liberal arts core curriculum, the Hartford Art School offers a comprehensive approach to education ►

that develops the whole person. We are dedicated to maintaining a dynamic environment in which gifts are enhanced, ideas are freely given and received, and creativity is nurtured and celebrated.

The campus' main art building houses studios for painting, photography, printmaking, two dimensional design, and media arts. Adjacent buildings provide space for programs in ceramics, sculpture, three-dimensional study, illustration, drawing, and visual communication design.

The Hartford Art School is an institutional member of the National Association of Schools of Art and Design and the National Portfolio Day Association.

## COLLEGE OF ENGINEERING, TECHNOLOGY AND ARCHITECTURE

### Engineering Technology Programs

Like to know how things work? Learn how to apply that knowledge to solve real-life problems in a career in engineering technology. As an engineering technologist, you bridge the gap between those who formulate the design and those who implement it. You have the theoretical background to work directly with the engineer or the architect. Yet you also have the practical, hands-on experience to oversee the work of crafts people. The demand for technologists with the combination of theoretical and practical knowledge is soaring. Technology baccalaureate programs include architectural, audio, computer, electronic, or mechanical engineering technology.

The Architectural Engineering Technology major offers students one of two tracks: a studio-intensive track, or a track for students interested in the building professions. The studio-intensive track is for qualified students who want to

become architects and may do so in the University of Hartford's Master of Architecture program. The building professions track is for students more interested in such areas as the technology, support, construction management, and real estate development aspects of the building professions.

The Audio Engineering Technology major spans the three disciplines of electronics, acoustics and music to prepare students for careers in the recording and music industries. The program stresses the fundamentals of electronics, music theory, harmony, and sound technology. Students may elect additional courses in music management, radio, television, and business administration for additional expertise for their professional career. Graduates of audio engineering technology programs may work in technical and/or support jobs toward creating systems for maximum quality of sound.

### Engineering Programs

If you're interested in becoming one of the engineers of the future, the University of Hartford's Engineering

programs serve as your launching pad. Here you will find modern facilities, a committed faculty, and quality programs.

You will learn the fundamentals of science and engineering in small classes that ensure you get individual attention and assistance. Dedicated faculty members who stay current in the field through active research and consultation will lead your classes. To enhance your engineering

opportunities, you will also take courses offered through the other excellent schools and colleges within the University.

## COLLEGE OF EDUCATION, NURSING AND HEALTH PROFESSIONS

Step onto the path to a personally rewarding career in the helping professions through study in the College of Education, Nursing and Health Professions. Classroom experience goes hand-in-hand with fieldwork in the Greater Hartford community, often as early as the first semester at the university. Rich and varied practical experiences fuel students' desire to learn, explore, and succeed, while complementing course discussions, readings, and lectures.

Opportunities abound on campus for education majors in University of Hartford Magnet School, University High School of Science and Engineering, Educational Main Street, and the Jump Start project. The college offers majors leading to teacher certification in early childhood education (grades K-6), integrated elementary ►

(grades K-6), and special education (grades K-12), and secondary English and mathematics education (grades 7-12).

Our programs in health sciences challenge students to apply their minds and talents toward the goal of careers in the health professions. Majors include a combined Bachelor of Science in Health Science (BS)/Doctor degree of Physical Therapy (DPT), a combined Bachelor of Science in Health Science (BS)/ Master of Science in Prosthetics and Orthotics (MSPO); pre-chiropractic, pre-dental, pre-optometry, pre-osteopathic medicine, pre-pharmacy and pre-podiatry; radiologic technology; respiratory care; and general health science. The radiologic technology program offers a choice of specialization in MRI or CT. The respiratory care program offers advanced clinical specialties of neonatal/pediatric respiratory care, pulmonary rehabilitation, and hyperbaric medicine. The health science premedical programs have affiliation agreements with medical schools that allow qualified students to complete baccalaureate and doctoral degrees within seven years.

#### PLEASE NOTE:

*\*Nursing is a part-time degree completion program for students who have an associate's degree in nursing.*

*\*Undergraduate students entering the combined Bachelor of Science in health science-doctoral degree program in physical therapy may proceed into the graduate phase of physical therapy provided they complete the B.S. degree and maintain program standards.*

## THE HARTT SCHOOL

With innovative programs in music, dance, and theater, The Hartt School is renowned for preparing many of the world's creative artists and teachers in the performing arts. In addition to performance majors in instrumental, vocal, jazz, music theater, theater performance (actor training), and jazz, Hartt offers music theory, and music and dance education majors, as well as cutting-edge programs in music

production and technology and in music and performing arts management.

Hartt's faculty members are active talented performers, educators, composers, and scholars who serve as mentors to their students. Master classes are given each year and have included Joe Wilder, Wynton Marsalis, Angel Romero, James Galway, and Warren Jones.

Musicians may perform in large orchestral, wind, or choral ensembles; solo recitals; and music theater productions. Hartt's Performance 20/20 provides a highly competitive, full-scholarship, honors chamber music program for top instrumental students. A partnership in training with Connecticut Opera provides vocal students the opportunity to participate in activities with the company, which may include roles or understudying in its productions. A variety of master classes and workshops are also features of this important collaboration.

## MULTIMEDIA WEB DESIGN & DEVELOPMENT

What sets the MWD2 program apart from computer science or MIS (Management Information Systems) is its emphasis on developing and combining skills in computer technology, graphic arts and information design as it is used for creating, processing, and communicating all types of information. MWD2 is interdisciplinary in nature, with a primary goal of preparing graduates for working with Internet and Web-based enterprises in business, education, and government. You will have the opportunity to tailor the curriculum to your specific interests and goals with specializations such as advertising, marketing, media arts, multimedia production, network administration, and professional and technical writing. Learn more at [mwd.hartford.edu](http://mwd.hartford.edu).

## HILLYER COLLEGE

As students make the transition to college, a major challenge is to adapt to the academic demands of their courses while choosing a major and preparing for success in their chosen fields. Hillyer College offers a program in which you can discover and realize your own potential for success.

The Hillyer College program allows you to complete many of the general education courses required for a bachelor's degree and start course work on your major. When you complete the Hillyer

program, you will be well prepared for future success as a junior in one of the University's bachelor's degree programs. As a student in Hillyer College, you will have a small-college experience in a university setting. You will participate in all aspects of university life while enjoying the supportive and more personal learning environment of a small college. Most classes have 20 students or fewer, which enables you to receive individualized attention from an exceptional faculty. Not only are our professors accomplished scholars, but they are also dedicated to teaching and enjoy working closely with students. ■

**SIMPLY THE BEST LIVING NEAR THE UNIVERSITY OF HARTFORD!**

Park Place Towers is nestled in a private park in the heart of downtown Hartford, so work or play is just minutes away. It's only steps from our door to in-town bus lines and two short blocks to I-84 and access to the interstate highway system.

Live close to theaters, the arts, music, sporting events, shopping, renowned universities, great restaurants, and exciting nightlife. Park Place Towers...the place to be!

**PARK PLACE TOWERS**  
 the place to be...!

24 Park Place  
 Hartford, CT 06106  
 860-951-3400  
 www.parkplacect.com

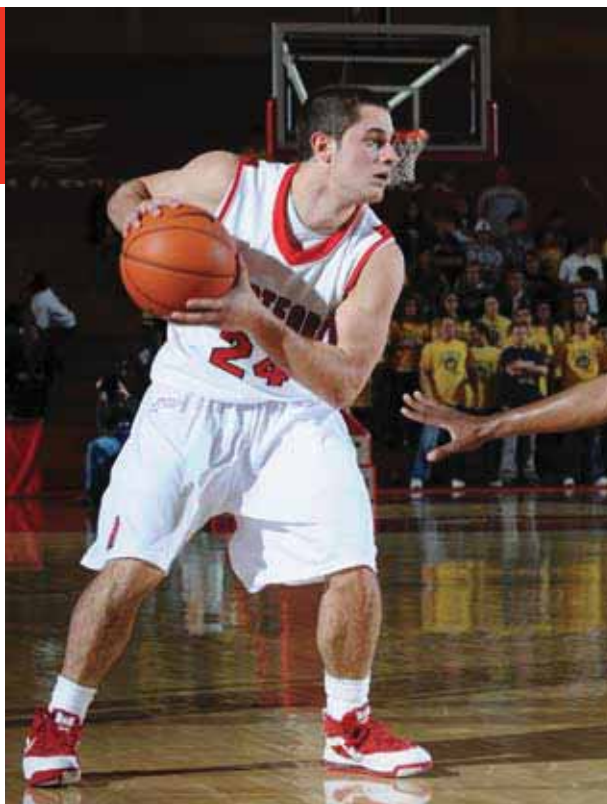

# Campus Life

You'll meet over fifty enthusiastic and dedicated students who will guide you through orientation. During Summer Orientation you will meet your academic advisor, register for classes and have lots of chances to meet other new students. Just prior to the start of classes, the university hosts Liftoff, during which new students engage in activity-packed days of social, academic, and recreational events. Designed to welcome you and your classmates into the university community, Liftoff is planned and organized for you by faculty, staff, and students. Learn more at [hartford.edu/orientation](http://hartford.edu/orientation).

The Student Success Center (SSC) is where our students go to have questions answered, get advice, share concerns, learn about upcoming activities, get connected with programming and leadership opportunities on campus, or just hang out in a friendly and supportive location. The SSC provides the resources and support necessary for a successful transition to college and an enjoyable and rewarding academic and social experience at the university. ■

## Division 1 Sports

If you enjoy playing competitive sports or simply rooting for your favorite teams from the sidelines, you'll find plenty to cheer about at the University of Hartford. We sponsor 18 different Division I teams, representing a broad range of sports for both men and women. If you would like to participate in sports—without the pressure of Division I play—you'll want to check out the university's active intramural sports programs for men and women. Check us out at [hartfordhawks.com](http://hartfordhawks.com). ■

## Residence Halls

Ninety-two percent of first-year students choose to live on campus because students describe our housing as “the best I’ve seen of any of the schools I visited.” Here’s why: First-year students primarily live in six newly renovated residence hall complexes. Each complex comprises several four-story buildings, and every floor is a community of about 20 students sharing nine bedrooms and two bathrooms. All buildings have laundry facilities and study areas.

First-year students also have the opportunity to live in Hawk Hall, a Residential Learning Community, where they are able to live among others who share the same interests or even may be taking courses together. The freshman residence has four residential floors and one activity floor. A residential floor includes 24 double rooms, three lounges, a laundry room, and separate bathrooms for men and women. ■

# Academic and Student Support Services

In college, you need certain academic skills to succeed—like the ability to read well, write clearly, and study effectively. If you would like some help in further developing these essential skills, you can stop by the university's Center for Reading and Writing. Our supportive, professional staff will work individually with you to increase your proficiency in writing,

research, and reading comprehension and speed, as well as studying and test taking skills. If you need additional assistance in mathematics classes, we also offer a special Math Tutoring Lab staffed by full-time faculty and majors who are Juniors and Seniors. Tutoring in other disciplines is also available from the Student Success Center. ■

## Internships, Co-Ops

**The experience you need for the job you want.**

The University of Hartford offers internship opportunities in a vast array of areas. Regardless of your major, there is an internship waiting for you. An internship gives you valuable on-the-job experience that helps you evaluate how much you would enjoy a career that you may be considering. It is also a great addition to your resume!

Because the University of Hartford maintains such excellent relationships with the surrounding businesses and medical facilities, we can offer our students challenging internship placements. Many of our graduates have found that these work experiences gave them a competitive edge in the job market. ■

# Career Center

**Practical help in choosing a career.**

New students can also take advantage of all the resources of our specially staffed Career Center. Our career counselors can help you identify your interests and explore careers that match those interests. Every year, the Career Center also hosts a Career Fair, where you can meet informally with representatives from different employers and learn firsthand about the career opportunities their companies offer.

When the time comes to find a job, the Career Center can also help you write your resume and develop interviewing skills that will prepare you to meet with the many on- and off-campus recruiters who actively seek out University of Hartford students. Learn more at [hartford.edu/career](http://hartford.edu/career). ■

## Study Abroad

You can choose from 60 different destinations for study abroad! What is more, you can study in English, or in the native tongue of the country you select, while earning University of Hartford credits and paying the same tuition. Go for a year, a semester, a summer, a winter or a spring break depending on your interests and your major. Semester and year abroad programs enable you to enroll at a foreign university; shorter-term programs focus on specific topics and are led by University of Hartford faculty. Recent faculty-led trips have taken students

to Dubai and Singapore to investigate international business, to Prague to study human rights, and to England to study literature. Italy has been a popular destination for trips focused on topics ranging from architecture to painting to drama to travel writing. A fully staffed Study Abroad Office helps students select a program that suits their interests and their academic requirements. The benefits of world travel are universal, no matter where you go. Learn more at [hartford.edu/studyabroad](http://hartford.edu/studyabroad). ■

## Applying

Applying online to the University of Hartford is fast, secure and it is free! Take advantage of our online Quick Response Application and the \$35 application fee is waived for all prospective students. Apply online at [admission.hartford.edu/apply](http://admission.hartford.edu/apply).

The Quick Response application must be completed in one sitting. You can apply online, or you may choose to download an application at [admission.hartford.edu/application.pdf](http://admission.hartford.edu/application.pdf) and mail it to the address below.

### TRANSCRIPTS AND TEST SCORES

Once you complete and submit the application, please be sure to have an official copy of your high school transcript as well as SAT or ACT scores sent to the University of Hartford. The university's SAT code is 3436 and the ACT code is 0606.

### RECOMMENDATION

A letter of recommendation is required for admission. Please download and print the recommendation form located at [admission.hartford.edu/Rec\\_Form.pdf](http://admission.hartford.edu/Rec_Form.pdf). Please select one of the waiver options, print and sign your name, and ask one of your high school teachers or your counselor to complete the

recommendation. The form should be returned to the following address.

### MAILING ADDRESS

University of Hartford  
Office of Admission  
200 Bloomfield Avenue  
West Hartford, CT 06117

## THE COMMON APPLICATION

### COMMON APPLICATION

The University of Hartford now accepts the Common Application. The Common Application is a not-for-profit organization that serves students and member institutions by providing an admission application online and in print. ■

## Campus Tours

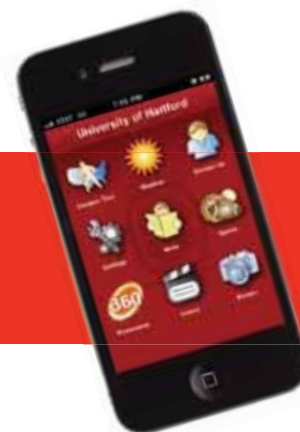

Campus tours are offered Monday through Friday and select Saturdays with varying tour times. Tours are offered in both a general format and major specific formats. Please visit [admission.hartford.edu/visiting](http://admission.hartford.edu/visiting) or call (800) 947-4303 for our complete tour schedule. The campus tour visits the

library, cafeteria, a freshmen dorm room, the sports center, and a classroom. Please feel free to explore our campus after the tour to visit other campus resources. If you have mobility concerns please contact our office prior to your visit. ■

## Student Financial Assistance

Each year, the university awards scholarships and grants up to full tuition on the basis of academic merit, artistic talent (Hartford Art School), and performance (The Hartt School). These scholarships are available to all students regardless of financial need and applicants are automatically considered for these awards when they are reviewed for admission to the university. The Office of Admission and Student Financial Assistance notify recipients in the offer of admission.

Students applying for need-based financial assistance must complete the Free Application for Federal Student Aid (FAFSA). We recommend filing the FAFSA prior to February 1st in order to receive first consideration for available need-based funds. Our Federal School Code is 001422. The forms are available on the Internet at [fafsa.gov](http://fafsa.gov). More information on financial assistance is available at [admission.hartford.edu/finaid](http://admission.hartford.edu/finaid). You may also call (800) 947-4303 to speak with a counselor. ■

## Online Virtual Tour

Take a virtual walk through the University of Hartford's Campus! Throughout the online tour, a virtual tour guide delivers valuable information as it leads you across the campus. You can explore each building on campus using a rich array of media content, such as videos, professional photographs and dozens of interactive panoramas. The wide-angle, high-resolution panoramas put you on location without leaving your home. Please visit [admission.hartford.edu/virtualtour](http://admission.hartford.edu/virtualtour) or look for our UofHartford free mobile app in both the App Store & Android Market. ■
